

# February 1, 2017 Steward Update

---

Dear Stewards,

1. No new product clarification this month.
2. **New Brunswick:** We are pleased to confirm that EPRA has been awarded the role of operating the regulated electronics recycling program by [Recycle New Brunswick](#), the local oversight body in the province.
  - **Registration:** If you have not registered already, registration can be [completed online](#).
  - **EHF:** Sales of new, regulated electronics will be obligated for reporting and remitting as of **June 1<sup>st</sup> 2017**. The designated products and applicable Environmental Handling Fees (EHFs) for New Brunswick [now available](#).
3. **OES, NS, PEI & NL:** A review of the Environmental Handling Fees has taken place and [EHF changes](#) will come into effect **June 1<sup>st</sup> 2017**.
4. **Ontario:** As anticipated, the oversight authority in Ontario has transitioned from Waste Diversion Ontario (WDO) to the Resource Productivity and Recovery Authority (RPRA) through proclamation on Wednesday, November 30<sup>th</sup>, 2016. There is no change to the Ontario Electronic Stewardship program at this time and stewards shall continue to report and remit as usual. More info regarding RPRA may be found by [clicking here](#).
5. **Yukon:** On July 12<sup>th</sup>, the Government of Yukon announced that it will postpone the implementation of Yukon's amended recycling regulations to provide for additional consultation with industry, [click here](#) for more information. The implementation date was originally October 11<sup>th</sup>, 2016, the new date is August 1<sup>st</sup>, 2017. Yukon pre-registration remains open [click here](#) to do so.

It is our pleasure to assist you. Please email us at [rep@epra.ca](mailto:rep@epra.ca) or call at 1-888-567-4535 with questions or suggestions.

Best regards,  
EPRA Steward Services

The following EHF changes will come into effect June 1<sup>st</sup>, 2017

<b>COMPUTER PERIPHERALS CONT'D</b>	<b>Product Definitions:</b> A manual input keying or pointing devices, such as a mouse, a keyboard, or a similar device, designed for use with a desktop or portable computer. Includes both wired and wireless devices. Additionally, OES includes integrated modems, disk drives and optical drives. A modem refers to a device that encodes digital computer signals into analog/analogue telephone signals and vice-versa and allows computers to communicate over a phone line or cable connection.									
	For NS&PEI, BC, QC, MB, SK, and Newfoundland, a combination of a single mouse and a single keyboard packaged in one OEM box under a single SKU is subject to a single EHF.

Tablet/smart phone hybrids						✓	✓				✓ effective June 1, 2017
<b>Product Definitions:</b> A handheld mobile communication device that utilizes cellular networks to transmit voice or data signals. Includes cell-enabled Personal Digital Assistants (PDAs).											
<b>Excluded:</b> • Wireless devices that do not utilize cellular networks to operate • Non-cell-enabled PDAs (Included in Personal/Portable Image, Audio, and Video Devices category)											

COUNTERTOP MICROWAVE OVENS	PROVINCE	BC	ARMA	SK	MB	OES	QC	NS/PEI	NFLD	NWT	NB
	<b>EHF</b>	-	-	-	-	<1.0 cu. Ft.: \$3.00 >1.0 cu. Ft.: \$3.00	-	-	-	-	-
May include microwave ovens from hotel rooms or restaurant units similar in chassis type to household type units					✓						
<b>Product Definitions:</b> A self-contained cooking appliance, designed to sit (non-enclosed) on a countertop, table, or shelf, that uses electromagnetic energy to perform the cooking function											
<b>Excluded:</b> • OTR/MHC: built-in or over-the-range microwave ovens and microwave/range hood combinations; microwaves that are built into a wall assembly or combined with a thermal wall oven; microwave ovens that are installed under a counter, in a wall cabinet, or attached to the wall of a cabinet • Large industrial or commercial kitchen or microwave ovens

FURTHER EXAMPLES TO BE POSTED											
<b>Product Definitions:</b> Electronic Toys generally weighing less than 50 grams.											
<b>Excluded:</b> <ul style="list-style-type: none"> <li>• Children's flashlights</li> <li>• Toys without electronics imbedded</li> <li>• Children's watches</li> <li>• Accessories, cabling, &amp; components sold separately that don't constitute the primary toy or game</li> </ul>											

### NOTES:

1. Products included/excluded are examples based upon member inquiries but do not represent an exhaustive list of all obligated products by category. Stewards must assess products against the definitions of each obligated product category to determine the applicability and appropriate EHF, and may consult the program for assistance in clarification where required.
2. Products identified as “Included in the Obligated Category” are subject to the EHF for that category; Products identified as “Not Included in the Obligated Category” are not subject to the EHF for that category, however, members must consider all obligated product categories to determine if the product meets the definition of another obligated product category.
3. In selected cases, selected products such as cables, connectors, chargers and remote controls, memory cards and USB keys are regulated and will be accepted for recycling at EPRA Québec depots, but do not attract an EHF.
4. Electronic equipment designed and intended to be used exclusively in an industrial, commercial or institutional (ICI) setting which exceed a unit weight threshold of 120 kilograms shall be excluded from the program (EPRA QC only).
5. A product is excluded from any category if it weighs >200kg, is professionally installed, or cannot readily and safely be de-installed, transported and/or recycled (EPRA BC and EPRA MB only).
6. A product is excluded from any category if it has been implanted in a person, if it is surgically invasive or is inserted into a patient's body, if it requires decontamination prior to recycling, or if it has come into contact with blood or other biological contaminants prior to end-of-life (EPRA BC only).
7. There are two instances where multiple obligated products may be packaged by the original equipment manufacturer (OEM) in a single physical package carrying a single SKU (stock-keeping unit) and be subject to one EHF for the entire package of products:
  - a) Where the product definition above specifically includes multiple obligated products, or
  - b) Where a product is comprised of different functional components that are sometimes sold separately, but in this case are integrate into a single operating unit.

In this instance, the integrated product carries the single highest EHF. Examples include:

### *Phase I*

- Display device with integrated video player (DVD, VCR, Blu-ray, etc.)
- Printer/Scanner/Fax (all-in-ones)

### *Phase II*

- Multiple drive players integrated into a single device –e.g. DVD & VCR player
- Fax machine with a corded telephone handset
- Telephone with built-in answering machine
- Security display monitor with built-in digital video recorder (DVR)

8. Floor-standing equipment should only include equipment which is integrated, and which cannot easily be broken down by the end-user for recycling (e.g. a mainframe). Floor-standing equipment is not considered one unit under the program if the equipment is comprised of easily-removable subcomponents. If the latter is the case, the rack or frame containing the equipment is excluded and the individual sub-components are covered in categories above as individual/multiple units.

9. Electronic Toys are defined as a plaything placed on the market that uses a cable/plug, batteries, of any type, or other untethered mechanism, to provide power to operate a feature function.

10. The list of Product Definitions and Clarifications may be revised periodically by the Program.
