

Product Definitions and Fees

November 1st, 2013 Update

Clarifications:

- **Bridge – Wireless Extender:** Having reviewed the product and regulation we have included it in the Computer and Video Game Peripherals category in EPRA-**Québec** effective Feb 1st, 2014
- **Odometers:** Obligated in the Personal/Portable category in all EPRA provinces effective Feb 1st, 2014
- Updates introduced on **select Bundled Systems** effective Feb 1st, 2014
- Full details provided on the **Clarification Tracking Sheet** – <http://www.eprassociation.ca/wp-content/uploads/2013/11/Product-Clarification-Tracking-Sheet-October-31st-Update-FINAL2.0.pdf>

Formatting Improvements, Corrections and Other Enhancements:

- **Displays > 29"** has been amended to **> 30"**. This is not a category or fee change; feedback received was that the < and > 29" symbols were difficult to distinguish.
- **SK: Desktop scanners** are not obligated in Saskatchewan. Documents have been updated to consistently show this. Not new information, simply correction to cross-referencing.
- **QC:** Computer and Video Game Peripherals have been amended in QC to include **Bridges, Wireless access points, Switches, Range Extenders** compliant with the QC regulation. Effective date for these items is February 1st, 2014.
- **Digital and non-digital cameras** have always been obligated and published as obligated in the provincial program product definition and fee documents. The appropriate checkmarks have now been added in the national document to ensure consistency.
- **NL: Wire line telephones and cordless telephones** have been updated to correctly show they are obligated in EPRA NL as they have been in published in the NL program since August, 2013.
- **Ceiling speakers also includes wall recessed speakers** under the Vehicle (Audio, Video, Navigation) Systems and Ceiling Speakers (Recessed Wall and Ceiling Speakers) category effective Dec 1st, 2013

Provincial Program Product Definitions and Fees

PROVINCE	BC	ARMA	SK	MB	OES	QC	NS/PEI	NFLD (Aug 1, 2013)
EHF	\$0.05	-	-	-	-	-	-	-
MICRO TOYS ELECTRONIC	Electronic toy promotional items (i.e. sold with meals)	August 1, 2013						
	Electronic action figures or dolls	August 1, 2013						
	Electronic toy key chains	August 1, 2013						
	Electronic toy vehicles	August 1, 2013						
	FURTHER EXAMPLES TO BE POSTED							
Product Definitions: Electronic Toys generally weighing less than 50 grams.								
Excluded: <ul style="list-style-type: none"> • Children's flashlights • Toys without electronics imbedded • Children's watches • Accessories, cabling, & components sold separately that don't constitute the primary toy or game 								

NOTES:

1. Products included/excluded are examples based upon member inquiries but do not represent an exhaustive list of all obligated products by category. Stewards must assess products against the definitions of each obligated product category to determine the applicability and appropriate EHF, and may consult the program for assistance in clarification where required.
2. Products identified as “Included in the Obligated Category” are subject to the EHF for that category; Products identified as “Not Included in the Obligated Category” are not subject to the EHF for that category, however, members must consider all obligated product categories to determine if the product meets the definition of another obligated product category.
3. In selected cases, selected products such as cables, connectors, chargers and remote controls, memory cards and USB keys are regulated and will be accepted for recycling at EPRA Québec depots, but do not attract an EHF.
4. Electronic equipment designed and intended to be used exclusively in an industrial, commercial or institutional (ICI) setting which exceed a unit weight threshold of 120 kilograms shall be excluded from the program (EPRA QC only).
5. A product is excluded from any category if it weighs >200kg, is professionally installed, or cannot readily and safely be de-installed, transported and/or recycled (EPRA BC only).
6. A product is excluded from any category if it has been implanted in a person, if it is surgically invasive or is inserted into a patient's body, if it requires decontamination prior to recycling, or if it has come into contact with blood or other biological contaminants prior to end-of-life (EPRA BC only).
7. There are two instances where multiple obligated products may be packaged by the original equipment manufacturer (OEM) in a single physical package carrying a single SKU (stock-keeping unit) and be subject to one EHF for the entire package of products:
 - a) Where the product definition above specifically includes multiple obligated products, or
 - b) Where a product is comprised of different functional components that are sometimes sold separately, but in this case are integrate into a single operating unit.

In this instance, the integrated product carries the single highest EHF. Examples include:

Phase I

- Display device with integrated video player (DVD, VCR, Blu-ray, etc.)
- Printer/Scanner/Fax (all-in-ones)

Phase II

- Multiple drive players integrated into a single device –e.g. DVD & VCR player
- Fax machine with a corded telephone handset
- Telephone with built-in answering machine
- Security display monitor with built-in digital video recorder (DVR)

8. Floor-standing equipment should only include equipment which is integrated, and which cannot easily be broken down by the end-user for recycling (e.g. a mainframe). Floor-standing equipment is not considered one unit under the program if the equipment is comprised of easily-removable subcomponents. If the latter is the case, the rack or frame containing the equipment is excluded and the individual sub-components are covered in categories above as individual/multiple units.

9. Electronic Toys are defined as a plaything placed on the market that uses a cable/plug, batteries, of any type, or other untethered mechanism, to provide power to operate a feature function.

10. The list of Product Definitions and Clarifications may be revised periodically by the Program.
